CEO MATTHIAS STADELMEYER'S COMMENTS

"This is the second consecutive quarter in which the gross profit trend improved year-onyear compared to previous quarters. This positive development is linked to increasing business from key clients and a general positive underlying trend across most countries. It is also the result of new product launches such as ADAPT, User Journey Reporting and Fingerprint Tracking and overall improvements to our systems and processes.

In April 2016 we launched TD ENGAGE which is a solution that helps online retailers to find new customers and allows Tradedoubler to address a larger part of the digital marketplace. TD ENGAGE uses a powerful combination of data and artificial intelligence to understand purchase behaviour and to accurately identify and reach both new and existing customers with relevant, targeted advertising. It is currently being rolled out in the UK and Germany with positive initial results and will be extended to our other markets over the rest of 2016.

In April 2016 we also relaunched our affiliate and technology offerings under the names of TD CONVERT and TD CONNECT, bringing greater clarity to how our suite of solutions creates smarter results for our clients. To showcase all our solutions in a more compelling way and drive increased engagement with clients and prospects we have developed a new corporate website, tradedoubler.com.

During the second quarter 2016 Tradedoubler will launch an initial version of Cross Device Tracking, a market-leading solution that will enable Tradedoubler to track the online purchase journeys of individual customers across multiple devices. To build on our heritage in innovation we recently launched TD Ventures, a business accelerator programme with a fund of €5 million to invest in digital start-ups. We are seeking companies that complement our existing business or that are pioneering new digital technologies. The development of these new client-led solutions and the launch of TD Ventures are integral to our strategy to address a broader digital marketplace.

We are making good progress with our continued work to bring Tradedoubler back to profitable growth."

THE GROUP'S RESULTS

Consolidated net sales during the first quarter 2016 were SEK 372 M (432). Excluding change related items, net sales were SEK 372 M (431). This was a decline of 14 per cent or 12 per cent adjusted for changes in exchange rates.

Hence, the first quarter 2016 showed an improvement in the year-on-year gross profit decline for the second consecutive quarter.

Gross margin, excluding change related items, was 21.7 per cent (20.7) in the first quarter and the improvement can predominantly be explained by a decline of low margin revenue.

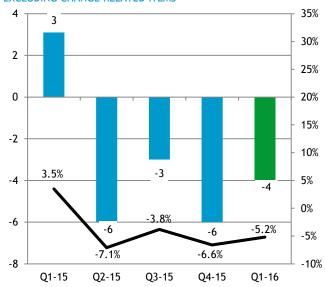

Operating costs, excluding depreciation, amounted to SEK 86 M (94) during the first quarter. Operating costs, excluding change related items and depreciation, were SEK 85 M (86). This was a decrease of 1 per cent, or an increase of 1 per cent adjusted for changes in exchange rates.

Net financial items in the first quarter were SEK -5 M (-2.1). Financial income and expenses amounted to SEK -4 M (-1.1) and exchange rate effects were SEK -1.2 M (-0.9). The larger negative financial net compared to the first quarter 2015, referred to lower returns on excess cash due to a revised finance policy which prohibit investments in high yield bonds.

In the first quarter, corporate income tax was SEK -1.7 M (2) and profit after tax for the first quarter was SEK -17 M (-10).

CASH FLOW

Cash flow from operating activities before changes in working capital was SEK -12 M (-8) in the first quarter 2016 and referred to EBITDA reduced with paid taxes, paid interest and non-cash items. Changes in working capital were SEK -0.2 M (9). As mentioned in the year-end report 2015, the working capital change in the fourth quarter was positively affected by temporary effects. These were reversed in January. At the end of the first quarter the working capital was affected by temporary effects of the same size as during the fourth quarter.

Investments in tangible and intangible assets during the first quarter amounted to SEK 10 M (12). Cash flow amounted to SEK -22 M (47) and net cash decreased by SEK -25 M (-7).

Tradedoubler has invested parts of the proceeds from the bond issue in December 2013 in interest bearing financial instruments. At the end of the first quarter 2016 a total of SEK 92 M (200) was placed in interest bearing financial instruments. The decrease can be explained by a revised Financial Policy that prohibits investments in high yield bonds. Previous held high yield bonds have therefore been sold during 2015.

FINANCIAL POSITION

Cash and cash equivalents at the end of the first quarter 2016 amounted to SEK 230 (165) M and was affected by translation differences of SEK -0.8 M (1). licensing revenue to subsidiaries. Operating profit (EBIT) was SEK -12 M (-14).

TRANSACTIONS WITH RELATED PARTIES

Aside from transactions in the normal course of business, to board and senior executives the following third party transactions have occurred during the first quarter 2016. Reworld Media has, as a publisher in France received remuneration of 7 KEUR and since January 2016 Reworld Media is providing HR-support to the French subsidiary at the cost of 3 KEUR per month. The arm lengths principle has been applied on these transactions.

FOREIGN EXCHANGE RISK

Foreign exchange risk refers to the risk that changes in exchange rates may affect the consolidated income statement, balance sheet and cash flow statement. Foreign exchange risk exists in the form of transaction risk and translation risk. Tradedoubler is exposed to foreign exchange risk in 17 countries involving eight different currencies, with Euro (EUR) and British pounds (GBP) representing the majority share. During the first quarter 2016 approximately 53 (46) per cent of group sales were made in EUR and approximately 36 (31) per cent in GBP. Approximately 28 (30) per cent of the group's costs were in EUR and approximately 25 (23) per cent in GBP. Net investments in foreign currency are not currently hedged. Exposure attributable to exchange rate fluctuation in client and supplier invoices is limited since invoicing to customers and from suppliers largely occurs in local currency for all companies in the group.
